OVERVIEW

The 800 MHz Transition Administrator, LLC ("TA") provides its Quarterly Progress Report to the Federal Communications Commission ("FCC") regarding the progress of the reconfiguration of the 800 MHz band for the quarter ended March 31, 2007. Pursuant to the FCC's *Reconfiguration Orders*, the TA, as the manager of the reconfiguration effort, is required to report on a quarterly basis the progress of band reconfiguration.²

The band reconfiguration program generally consists of two broad stages of activity: the clearing of 806-809 MHz/851-854 MHz (Channels 1-120); and the relocation of Public Safety's NPSPAC channel users to this vacated spectrum. The clearing of Channels 1-120 has proceeded largely in accordance with program expectations; Frequency Reconfiguration Agreements ("FRAs") are in place for 87 percent of all non-border area licensees, and 77 percent of all non-border area licensees are reported cleared by Sprint Nextel, accounting for 25 of the 55 NPSPAC regions.

In the reconfiguration of Public Safety users, progress continues to be made but has proven to be much more challenging and time-consuming than the reconfiguration of commercial 800 MHz users. This is due in large part to the need for licensees to complete the planning of their reconfiguration prior to the negotiation of an FRA. The licensee planning process, which most stakeholders agree is essential to proper execution of reconfiguration, has had a significant impact on the entering into of FRAs, which on average have been executed by the parties approximately six months following the start of mediation. In addition, while the reconfiguration of Public Safety systems operating in the Expansion Band is moving forward, with several dozen systems already completed, Sprint Nextel has suggested the need for more detailed joint planning with NPSPAC licensees and their vendors to agree on specific time tables for reconfiguration of infrastructure.

During the quarter, parties completed negotiations on 122 additional FRAs, raising the total percentage complete to 45 percent for Wave 1, Stage 2 and 22 percent for all Stage 2 FRAs. The TA continues to work with all parties to complete FRA negotiations on a time table that fully accommodates the needs of Public Safety and to initiate reconfiguration of subscriber

Jan. 19, 2005); Memorandum Opinion and Order, 20 FCC Rcd 16015 (2005) ("Memorandum Opinion and Order") (collectively "Reconfiguration Orders").

² 47 C.F.R. § 90.676(b)(3).

equipment where possible. Furthermore, the TA is working with the parties to address the scheduling issues that have been raised.

Stage 1: Clearing of Channels 1-120

In Stage 1, progress continues to be made largely in accordance with the program schedule. As of March 31, 2007, 87 percent of the 1,008 Stage 1 licensees not affected by international border areas have successfully negotiated TA-approved FRAs. This includes 98 percent of Wave 1, 99 percent of Wave 2, and 89 percent of Wave 3. For Wave 3, of the 29 FRAs outstanding, 17 licensees entered into Planning Funding Agreements ("PFAs") and were granted additional time to complete planning work to arrive at a reconfiguration cost estimate. For Wave 4, as of March 31, 2007, the TA received and approved 98 FRAs out of an expected total of 168 FRAs (58 percent). The mandatory negotiation period ended on January 2, 2007, and the mediation period commenced January 3, 2007 for Wave 4, Stage 1 licensees not affected by the international border areas with Mexico and Canada, with 70 mediation dockets opened.³ As of March 31, 2007, 52 Wave 4 mediation dockets had been resolved; the parties in 11 mediation dockets entered into PFAs; and the parties in four mediation dockets reached agreement on terms but had not yet executed their PFAs or FRAs. For those licensees affected by the border areas, the FCC announced a second 90-day extension of the mandatory negotiation period in a Public Notice on March 30, 2007.⁴ There are 201 licensees in Wave 4 that hold call signs with sites located in, or adjacent to, FCC-defined border areas that are affected by this extension. The development of border area frequency plans remains a necessary milestone for successful completion of the program.

With regard to physical clearing of Channels 1-120, as of March 31, 2007, Sprint Nextel reported that 77 percent of all Stage 1 non-border area FRAs, accounting for 56 percent of all Stage 1 call signs, have been cleared by non-Sprint Nextel and non-SouthernLINC licensees.⁵

_

³ The remaining deals out of the 168 expected FRAs are for licensees affected by the international border areas.

⁴ See Public Notice, "Public Safety and Homeland Security Bureau Extends Negotiation Period between Sprint Nextel and Border Area Non-NPSPAC Licensees in Wave 4, Stage 1 of 800 MHz Band Reconfiguration," WT Docket No. 02-55, DA 07-1542 (rel. Mar. 30, 2007) ("Wave 4 Extension Public Notice").

⁵ December 26, 2006 is the date set by the FCC as a benchmark for clearing all Stage 1 incumbent licensees in 20 or more NPSPAC regions. *See* Public Notice, "Wireless Telecommunications Bureau Announces that 800 MHz Band Reconfiguration Will Commence June 27, 2005, in the NPSPAC Regions Assigned to Wave 1 and Specifies 800 MHz Reconfiguration Benchmark Compliance Dates," WT Docket No. 02-55, DA 05-1546 (rel. May 27, 2005) ("*Benchmark Compliance Public Notice*"). During the first quarter of 2007, the TA evaluated Sprint Nextel's progress in clearing these NPSPAC regions. Details of the TA's findings are included in Section I.A.1 of this report.

Stage 2: NPSPAC and Public Safety Expansion Band Reconfiguration

Progress in reaching agreements is clearly being made in Stage 2, and mediation has proven to be an effective tool for requiring all stakeholders to work toward an agreed-upon schedule, in addition to resolving disputes. During the first quarter, parties completed negotiations on 122 FRAs, raising the total percentage complete to 45 percent for Wave 1, Stage 2 and 22 percent for all Stage 2 FRAs. Out of all Stage 2 mediations, only 24 cases, or four percent, have been referred to the FCC for *de novo* review.

During the first quarter of 2007, mediation continued for most Wave 1, Stage 2 licensees and commenced for nearly all Wave 2, Stage 2 licensees. Pursuant to the FCC's *Report and Order*, parties are required to enter mediation if they have not negotiated an FRA by FCC-established deadlines. The TA has found that in many cases the licensee needs to complete the planning of its reconfiguration as a prerequisite to meaningful FRA negotiations. Most stakeholders have noted that planning is essential to proper execution of reconfiguration, and the TA has provided flexibility in the mediation process to complete planning so long as progress continues to be made. Once planning has been completed, the TA strives to bring parties to an agreement within 30 days.

Thus far, nearly half of the licensee population has requested planning funding and negotiated a PFA prior to negotiating an FRA. The TA finds that the planning process can range from two months to well over a year in duration and tends to consume approximately ten months on average – four months to negotiate the PFA, and six months to complete the planning and reconfiguration cost estimate. The amount of incremental time actually added to the schedule depends upon when a licensee initiates the process. In some cases, planning funding negotiations were not completed prior to the commencement of mediation, and the initial output of mediation has been a PFA. In cases where planning funding was not requested, many of these planning activities are occurring during FRA negotiations as a *de facto* planning process.

In a recent interview with the publication Mission Critical Communications, the executive director of Utah Communications Agency Network ("UCAN") highlighted the importance of planning and the challenges presented by rebanding that must be addressed. "One of the key issues for each agency involved in rebanding will be the development of the 'process' they use to accomplish the tasks," he said. "That will vary in every system across the nation. In other words, UCAN's process will not fit the process of another system in another area of the country. The individual nuances associated with each network will dictate how they accomplish the work…Inventing the process requires a lot of thought, coordination, and hard work." UCAN and Sprint Nextel executed a PFA in early February 2006 and expect to complete FRA negotiations in June 2007.

Once actual FRA negotiations have commenced, progress has been slowed in some cases by issues arising between Sprint Nextel and vendors involved in the reconfiguration

_

⁶ Mission Critical Communications, "800 MHz Rebanding – Incumbent Update," pp 14-18, May 2007 (available at http://www.mccmag.com).

process. Because vendors are not parties to an FRA, under the ADR Plan the TA may not directly mediate such disputes unless both parties request mediation. (To date, neither Sprint Nextel nor any vendors have requested the TA's assistance in mediating the disputes that arise between them.) The TA has observed that licensees are constrained in their ability to influence their vendors' behavior vis-à-vis Sprint Nextel with respect to certain cost issues. Combined with the time necessary to negotiate PFAs and conduct planning, these factors have resulted in an average of over six months to complete an FRA once mediation has commenced, with a significant number of cases taking longer based on current projected planning completion dates. This average may decline going forward, as licensees in later waves are generally farther along in completing planning, and thus far the TA has been generally successful in meeting the 30-day goal for FRA negotiations once planning is complete.

Since commencement of Stage 2 negotiations, a number of program stakeholders have cited the difficulty and length of the Stage 2 negotiation and mediation process. The TA believes that a number of factors have contributed to the more complicated negotiation and mediation process in Stage 2; among them are:

- (1) Program Size and Scope. The large number of concurrent negotiations and mediations has taxed the resources of Sprint Nextel and 800 MHz vendors and consultants. Additionally, issues under negotiation with one licensee may have forward-looking programmatic relevance well beyond the dollar value to that licensee.
- (2) Program Standards. Both Sprint Nextel and the licensee must agree on a cost estimate to enter into a PFA or FRA. Each is entitled to protect its interests consistent with the rights and obligations established by the FCC. Sprint Nextel, for its part, has expressed reluctance to agree to certain cost estimates under the "minimum costs" standard as articulated by the FCC. Further, as noted herein, in many cases a dispute between Sprint Nextel and the licensee concerns costs of the licensee's vendors and consultants, which introduces myriad complexities and additional parties into the negotiations.

Resolution of any disputes between the parties must proceed with due process afforded to all parties consistent with the FCC's *Report and Order* and the TA's ADR plan. Consistent with the timelines established for alternative dispute resolution by the FCC, at the outset of the mediation period, the TA Mediator consults with the licensee and Sprint Nextel about the status of negotiations and assesses each case to determine whether the parties are in active dispute. Activity within mediation is scaled according to the needs of the parties in reaching agreement and resolving disputes. In particular, mediation is based upon the mediator's assessment of the parties' progress, the need for additional time to secure vendor support or legal counsel, obtain planning funding and/or complete planning where required, and commence active negotiations.

-

⁷ See Report and Order at ¶ 198 ("The submission to the Transition Administrator shall contain the licensee's certification that the funds requested are the minimum necessary to provide facilities comparable to those presently in use."); see also Letter from R. Keeney, Counsel to Sprint Nextel, to M. Dortch, Federal Communications Commission, "Ex Parte Presentation," WT Docket No. 02-55 (filed Apr. 20, 2007).

Exercising such discretion as afforded by the FCC's rules, the TA may grant limited extensions of the mediation period and, if the parties are making progress towards reaching agreement, may recommend that the FCC grant further extensions, as a preferred and more efficient alternative to having a large number of incomplete cases before the FCC. The TA refers disputes to the FCC when the disputes are ripe for resolution by the FCC.

The TA expects that implementation will be equally, if not more, challenging and complex. Of immediate concern is a significant NPSPAC implementation scheduling issue. Beginning in November 2006, Sprint Nextel ceased providing fixed implementation dates in FRAs for NPSPAC licensees, suggesting a need for additional joint planning with licensees and vendors. In February 2007, Sprint Nextel and representatives of the Public Safety community submitted a joint letter to the FCC, requesting that the FCC "task the TA with developing plans and recommended benchmarks for NPSPAC reconfiguration," taking into consideration, among other things, "the status of plans for maintaining interoperability among NPSPAC systems" and "the impact on all incumbent operators, including Sprint Nextel, within relevant geographic areas."

While parties are generally expected to be in the best position to understand their own needs and constraints and address them as part of negotiating an agreement, the TA has nevertheless initiated a systematic review of licensee status and expected reconfiguration time frames, in conjunction with dialogue with a number of licensees, vendors, and Sprint Nextel regarding their readiness and constraints. While it is too early to draw definitive conclusions as to specific implementation benchmarks for NPSPAC reconfiguration, the TA currently believes, based on progress made to date, that parties can and must complete a number of NPSPAC licensee reconfigurations in 2007, including several systems that should serve to validate the functionality of key software developed for the rebanding process.

For Public Safety systems operating in the Expansion Band without NPSPAC, parties are negotiating fixed schedules for implementation and reconfiguration is proceeding. As of the publication of this report, thirty-six licensees in the Expansion Band have completed reconfiguration, and 60 more have executed an FRA and, to the extent they are not also NPSPAC licensees, are proceeding with reconfiguration.

A key component of furthering rebanding progress is the reconfiguration of subscriber equipment. During this quarter, the TA made available to licensees the Subscriber Equipment Deployment initiative, an option to obtain replacement subscriber equipment and related software and services in advance of completing all cost negotiations. To simplify and expedite the process, the TA worked in conjunction with stakeholders to develop standard levels of effort for most subscriber reconfiguration activities that should accommodate a majority of licensee situations. These standards should effectively eliminate cost negotiations for subscriber reconfiguration for most licensees and enable licensees to proceed with subscriber-related

_

⁸ See Letter from R. Gurss, APCO International, to M. Dortch, Federal Communications Commission, "Ex parte Communication," WT Docket No. 02-55 (filed Feb. 15, 2007) (attaching letter to Chairman K. Martin).

activities in parallel with completion of negotiations for infrastructure costs and timing. While participation is optional, the TA strongly encourages those licensees that have not yet completed a full FRA to take advantage of this option.⁹

In closing, while it is clear that the NPSPAC stage of rebanding is much more complex and time-consuming than was anticipated, it is also clear that much has been accomplished and that steady, measurable progress is being made. All parties must sustain their efforts and continue to work in good faith to resolve issues if the program's goal of resolving interference in the 800 MHz band is to be realized.

-

⁹ The TA reminds all parties that subsequent "touches" to subscriber equipment that may be required can be included in a Subscriber Equipment Deployment request, subject to the FCC's guidance regarding circumstances under which multiple touches may generate recoverable rebanding expenses. *See* Order, City of Boston, Massachusetts and Sprint Nextel, WT Docket No. 02-55, DA 07-583 (rel. Feb. 7, 2007), ¶¶ 9-12.

I. RECONFIGURATION PROGRESS

This section of the Quarterly Progress Report summarizes the status of negotiations and reconfiguration implementation by wave and stage as of the quarter ended March 31, 2007, discusses issues identified, and describes process changes and other specific actions the TA has taken to address issues identified to date.

A. Overview of Status Against Schedule

Reconfiguration commenced on June 27, 2005, with the voluntary negotiation period for licensees in Wave 1, Stage 1 (Channels 1-120). Stage 1 licensees are primarily small commercial, conventional systems that must be cleared from Channels 1-120 before Public Safety systems operating on NPSPAC channels (Stage 2) can be reconfigured. The voluntary and mandatory negotiation periods, as described in the TA's Regional Prioritization Plan ("RPP"), have concluded for all waves and stages, except Wave 4, Stage 2.

1. Summary of Status

As further described below, significant progress has been made to date in the negotiation, and approval of FRAs for Stage 1 as well as the clearing of these channels. As of March 31, 2007, 87 percent of FRAs for Channels 1-120 frequencies have been submitted to the TA. The contract value of these FRAs totals \$53.6 million. The total number of FRAs approved by the TA represents 98 percent of anticipated FRAs for Wave 1, Stage 1; 99 percent of Wave 2, Stage 1; and 89 percent of Wave 3, Stage 1. In addition, as of March 31, 2007, approximately 56 percent (up from 52 percent as of December 31, 2006) of the Channels 1-120 call signs (non-EA) were reported by Sprint Nextel as being cleared by licensees, including 85 percent of Wave 1 and 93 percent of Wave 2 call signs.

For Stage 2 (NPSPAC channels), these systems and FRAs generally are larger and more complex than those of Channels 1-120 licensees. As further described below, as of the end of the first quarter of 2007, the TA received 155 Wave 1, Stage 2 FRAs with a contract value totaling \$30 million. Of these the TA approved 143 FRAs. In addition, the TA received 124 PFAs and approved 121 PFAs for Wave 1, Stage 2 licensees as of March 31, 2007.

The three-month mandatory negotiation period for Wave 2, Stage 2 licensees, which began on November 1, 2006, ended on January 31, 2007. As of March 31, 2007, the TA received 58 Wave 2, Stage 2 FRAs and approved 51. In addition, the TA received 79 PFAs and approved 73 PFAs for Wave 2, Stage 2 licensees as of March 31, 2007. The mandatory negotiation period for licensees in Wave 3, Stage 2 ended on April 30, 2007. Wave 4, Stage 2 licensees are currently in the mandatory negotiation period, which began on May 1, 2007.

2. <u>18-Month Benchmark</u>

In the *Report and Order*, the FCC established an 18-month benchmark whereby Sprint Nextel must complete, and the TA must certify that Sprint Nextel has completed, retuning of Channels 1-120 in 20 NPSPAC regions. The FCC modified this interim benchmark in the

Supplemental Order to require more specifically that within 18 months from the start of reconfiguration, Sprint Nextel must: (1) relocate all incumbent licensees, except for Sprint Nextel and SouthernLINC, from Channels 1-120 in the first 20 NPSPAC regions the TA has scheduled for band reconfiguration; and (2) initiate retuning negotiations with all NPSPAC licensees in these 20 NPSPAC regions. ¹⁰ In its May 27, 2005 Public Notice announcing the start of Wave 1 reconfiguration, the FCC announced that the start date for reconfiguration was June 27, 2005, which is also the start date for computation of the 18-month benchmark. ¹¹ Accordingly, the 18-month benchmark compliance date was December 26, 2006.

On January 26, 2007, Sprint Nextel filed with the FCC a complete report of the status of Channels 1-120 reconfiguration and its compliance with the 18-month benchmark as of December 26, 2006. Psprint Nextel informed the FCC that it has retuned all non-Sprint Nextel and non-SouthernLINC Channel 1-120 incumbent licensees to comparable replacement channels in 26 NPSPAC regions and initiated negotiations with every NPSPAC channel licensee in 37 NPSPAC regions. In addition, Sprint Nextel asserted that it has completed all the steps necessary to enable all Channels 1-120 incumbent licensees in an additional nine NPSPAC regions to retune their systems. Sprint Nextel asserted that it has either cleared comparable replacement channels or is prepared to do so upon notice from the incumbent licensee that it is ready to retune. Sprint Nextel also asserted that it has initiated negotiations with every NPSPAC licensee in each of these nine NPSPAC regions.

On March, 20, 2007, at the request of the FCC, the TA certified certain facts that Sprint Nextel presented in its January 26, 2007 filing with the FCC.¹³ The TA limited its review and certification of facts to those concerning the clearing of all 1-120 channel incumbents in the 26 regions and the initiation of negotiations with every NPSPAC licensee in 37 regions. In the 26 NPSPAC regions stated by Sprint Nextel to have been cleared as of December 26, 2006, ¹⁴ the TA found a total of 70 channel 1-120 licensees holding 126 call signs that were still shown in the FCC's Universal Licensing System with active authorizations for channel 1-120 frequencies. The TA was able to certify clearing by December 26, 2006 in 69 of the 70 cases through a review of supporting evidence; in the remaining case, there was insufficient evidence for the TA to draw a firm conclusion on whether the channel had been cleared by December 26, 2006.

¹⁰ Supplemental Order at \P 53.

¹¹ See Benchmark Compliance Public Notice.

¹² See Letter from L. Krevor, Sprint Nextel, to D. Furth, Federal Communications Commission, "Progress Report for 800 MHz Band Reconfiguration," WT Docket No. 02-55 (filed Jan 26, 2007).

¹³ See Letter from B. Haan, 800 MHz Transition Administrator, LLC, to D. Furth, Federal Communications Commission, "Certification of Sprint Nextel 18-Month Benchmark Report," WT Docket No. 02-55 (filed Mar 20, 2007).

¹⁴Sprint Nextel claimed it could exclude certain 1-120 channel licensees in five of the 26 regions from the benchmark requirements. The TA rendered no opinion on the validity of this claim and based its review of the clearing of 1-120 channel licensees in the 26 regions solely on the total number of licensees.

In its January 26, 2006 filing, Sprint Nextel certified that it initiated negotiations with all NPSPAC licensees as of December 26, 2006 in the following 37 NPSPAC regions:

Kentucky Alabama Tennessee Alaska Minnesota Texas – Austin Texas – Dallas Arkansas Missouri California-Northern Montana Texas – Houston Texas – Lubbock Colorado Nebraska District of Columbia Region U.S. Virgin Islands Nevada

Great Lakes New England Utah
Hawaii New York Virginia
Idaho North Dakota West Virginia
Illinois Oklahoma Wisconsin
Indiana Oregon Wyoming

Iowa Pennsylvania – Eastern

Kansas South Dakota

The TA certified that Sprint Nextel appears to have initiated negotiations with all licensees in the above 37 NPSPAC regions on or before December 26, 2006, with the exception of 29 licensees (located in 12 NPSPAC regions) for which the evidence provided by Sprint Nextel was insufficient to draw that conclusion.

3. Recent Developments Regarding Schedule

On March 30, 2007, the FCC issued a Public Notice modifying the schedule for Wave 4, Stage 1 licensees that hold call signs with locations in the international border areas defined by the FCC. The FCC extended the mandatory negotiation period by 90 days until July 1, 2007 and postponed the start of the mediation period until July 2, 2007 for Wave 4, Stage 1 border area licensees. During the extended negotiation period, Wave 4, Stage 1 border area licensees are not required to engage in planning or negotiation prior to the receipt from the TA of proposed replacement frequencies, although they may elect to engage in such activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs. If funding is required, licensees will need to submit a Request for Planning Funding ("RFPF") to the TA and negotiate a PFA with Sprint Nextel.

B. Overview of Negotiations for Stage 1 (Channels 1-120)

The following sections provide a summary of progress during the first quarter of 2007 of negotiations for Stage 1 reconfiguration. There has been significant progress in the negotiations of Stage 1 FRAs. As shown in the table below, as of March 31, 2007 there are 1008 FRAs

_

¹⁵ See Wave 4 Extension Public Notice. Locations within 110 km (68.4 miles) of the U.S./Mexico border or within 140 km (87 miles) of the U.S./Canada border are within the FCC-defined border area.

anticipated for Stage 1 licensees in all waves.¹⁶ As of March 31, 2007, 878 FRAs (87 percent) have been submitted to the TA and 872 FRAs have been approved by the TA. The total number of FRAs approved by the TA represents 98 percent of Wave 1, Stage 1; 99 percent of Wave 2, Stage 1; and 89 percent of Wave 3, Stage 1.

Table 1: Status of FRA Negotiations for Stage 1 (Channels 1-120) Licensees as of March 31, 2007

		By N	umber of	FRAs		By Number of Call Signs					
Wave	Total	Submitted To TA		Approved By TA		Total	Submitted In TA		Approved By TA		
		#	%	#	%		#	%	#	%

*Wave TBD (To Be Determined) – Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave. In addition, certain Economic Area ("EA") licensees are included in this "Wave TBD" category. The TA has received and approved five FRAs that have included EA licenses.

As shown in Map 1, as of March 31, 2007, the TA has reviewed and approved FRAs for 100 percent of the site-specific (non-EA) Stage 1 call signs in 12 of the 15 NPSPAC regions in Wave 1, Stage 1; ¹⁷ 15 of the 19 NPSPAC regions in Wave 2, Stage 1; and one of the nine NPSPAC regions in Wave 3, Stage 1. ¹⁸ The map shows the percentage of FRAs under contract as of the end of the first quarter 2007 in comparison to the percentage under contract at the end of the fourth quarter 2006 (displayed as first quarter percentage/fourth quarter percentage). As Map 1 shows, there was especially marked progress during the first quarter in the following

¹⁶ The estimate of total FRAs does not include FRAs for licensees affected by the international border areas where revised border area frequency plans are still being developed.

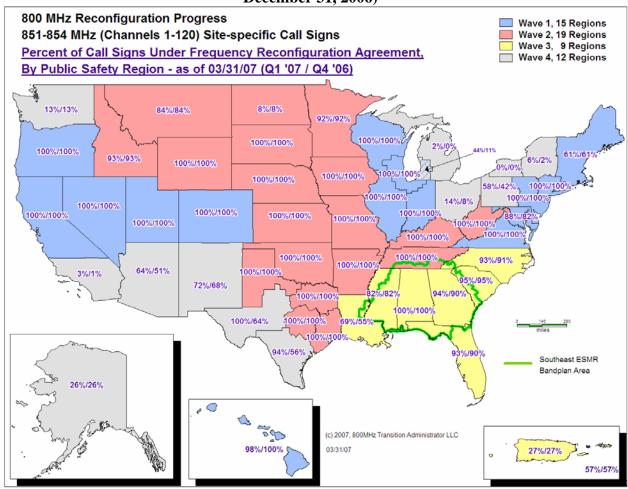

¹⁷ Call sign WPFV680 (1-120 channels) was reinstated by the FCC in Hawaii on February 27, 2007. Prior to the start of reconfiguration this call sign had been deleted from the ULS database of active call. As a result, for the quarter ending March 31, 2007 the percentage of call signs under contract and cleared (Map 2) has reverted to less than 100 percent.

¹⁸ In Wave 1, all non-EA call signs not under FRA are in mediation or are the subject of Recommended Resolutions that are pending before the FCC, with the exception of NPSPAC Region 19 (New England) which also has call signs pending availability of revised border area frequency plans. In Wave 2, all non-EA call signs not under FRA in the four Wave 2 NPSPAC Regions with less than 100 percent under FRA are pending availability of revised border area frequency plans. In Wave 3, all non-EA call signs not under FRA are in mediation, are the subject of Recommended Resolutions that are pending before the FCC, or had Gulf Coast Wave Change Requests granted and were deferred to Wave 4.

NPSPAC regions – Arizona, New Mexico, Texas – El Paso, and Texas – San Antonio – which all reached 100 percent of FRAs approved.

Map 1: Percentage of Channels 1-120 Call Signs under a Frequency Reconfiguration Agreement by NPSPAC Region as of March 31, 2007 (as compared to percentage as of December 31, 2006)¹⁹

Appendices 1 and 2 provide information in summary form about reconfiguration status for Channels 1-120 licensees as of March 31, 2007.

1. **Wave 1, Stage 1**

As shown in Table 1, as of March 31, 2007, approximately 98 percent of the 353 FRAs expected for Wave 1, Stage 1 have been negotiated. As of March 31, 2007, the TA has reviewed and approved FRAs for 100 percent of the site-specific (non-EA) Channels 1-120 call signs in twelve of the 15 NPSPAC regions in Wave 1, Stage 1. As of March 31, 2007, the remaining

¹⁹ Regions adjacent to international borders will not reach 100 percent until revised border area frequency plans are available.

FRAs to be negotiated in Wave 1, Stage 1 were all in mediation or the subject of Recommended Resolutions pending before the FCC. The ADR, or mediation, period for Wave 1, Stage 1 licensees began on December 27, 2005. On that date, the TA opened mediation dockets (or "cases") for 172 incumbent licensees, including 63 Public Safety licensees that had not filed with the TA an FRA governing the reconfiguration of their call signs. In addition to the 172 mediation dockets opened for Channels 1-120 licensees, the TA opened four mediation dockets for Wave 1, Stage 1 Economic Area ("EA") licensees that had been given the option to file new elections or modifications to previous elections to relocate to or remain in the ESMR Band by the FCC's *Memorandum Opinion and Order*.

As of March 31, 2007, of the 176 mediation dockets opened, 170 mediation dockets had been resolved through the negotiation of FRAs or the cancellation or assignment of licenses; three resulted in PFAs with FRAs still to be negotiated upon the completion of the planning contemplated by the PFAs; and three mediations, which had previously been referred to the FCC for *de novo* review are either pending being appealed or in the process of being resolved by the parties. In addition, the TA had received and granted a total of 14 requests for mediation arising out of the implementation of FRAs involving Wave 1, Stage 1 licensees. Nine of these disputes were resolved by March 31, 2007 and all but one was resolved by May 10, 2007.

2. <u>Wave 2, Stage 1</u>

As shown in Table 1, as of March 31, 2007, approximately 99 percent of the 206 FRAs expected for Wave 2, Stage 1 have been negotiated. As of March 31, 2007, the TA has reviewed and approved FRAs for 100 percent of the site-specific (non-EA) Channels 1-120 call signs in 15 of the 19 NPSPAC regions in Wave 2, Stage 1. The remaining FRA to be negotiated in Wave 2, Stage 1 is in mediation and it involves Southeast ESMR Band frequencies, but does not involve Channels 1-120 frequencies. The mediation period for Wave 2, Stage 1 licensees began on April 3, 2006. Prior to the formal start of the mediation period, the TA granted 14 requests for mediation involving Wave 2, Stage 1 licensees during the mandatory negotiation period. On April 3, 2006, the formal start of the mediation period, the TA opened 75 mediation dockets, in addition to the 14 that had been previously opened, for a total of 89 Wave 2, Stage 1 mediation dockets. Of these 89 mediation dockets, 23 involved Public Safety licensees.

As of March 31, 2007, 88 mediation dockets had been resolved through the negotiation of FRAs or the cancellation or assignment of licenses, and one resulted in the negotiation of a PFA with an FRA still to be negotiated upon the completion of the planning contemplated by the PFA.

As of March 31, 2007, the TA had received and granted four requests for mediation arising out of the implementation of FRAs involving Wave 2, Stage 1 licensees, two of which have been resolved and one of which has been forwarded to the FCC for *de novo* review.

²⁰ Wave 1, Stage 1 licenses affected by the border areas did not enter into mediation and were deferred pending the availability of revised border area frequency plans.

3. Wave 3, Stage 1 (Channels 1-120 and Expanded Southeast ESMR Band)

Wave 3, Stage 1 has a disproportionate number of transactions given the smaller number of NPSPAC regions assigned to this wave compared to Waves 1 or 2. Wave 3 includes the Southeastern United States, which has an expanded ESMR Band plan that requires additional licensees to be relocated out of 813.5-817 MHz/858.5-862 MHz as part of Stage 1.²¹ This expanded range includes more Public Safety licensees than in prior waves that covered only 806-809 MHz/851-854 MHz, which is more heavily licensed with commercial entities.

As shown in Table 1, as of March 31, 2007, the TA received 225 FRAs and approved 225 FRAs for Wave 3, Stage 1 (Channels 1-120 plus the Southeast ESMR Band) licensees out of an expected total of 254 FRAs needed to clear Channels 1-120 and the expanded ESMR Band in the Southeastern United States. Thus, 89 percent of the FRAs expected for Wave 3, Stage 1 have been approved by the TA. As of March 31, 2007, the TA has reviewed and approved FRAs for 100 percent of the site-specific (non-EA) Channels 1-120 call signs in one of the nine NPSPAC regions in Wave 3, Stage 1. Numerous licensees submitted either Wave 3 ESMR Negotiation Deferral Requests or Gulf Coast Wave Change Requests. Licensees whose Wave 3 ESMR Negotiation Deferral Requests were granted had their negotiations and reconfiguration implementation deferred to Wave 3, Stage 2. Licensees whose Gulf Coast Wave Change Requests were granted had their negotiation implementation moved to Wave 4, Stage 1.

The Wave 3, Stage 1 mediation period began on July 3, 2006. Prior to the formal start of the mediation period, the TA granted 29 requests for early mediation involving Wave 3, Stage 1 licensees. On July 3, 2006, the formal start of the mediation period, the TA opened 121 mediation dockets, in addition to the 29 that had been previously opened, for a total of 150 Wave 3, Stage 1 mediation dockets. Of these 150 mediation dockets, 93 involved Public Safety licensees.

As of March 31, 2007, 129 mediation dockets had been resolved through the negotiation of FRAs or the cancellation or assignment of licenses; 17 resulted in the negotiation of PFAs with FRAs still to be negotiated upon the completion of the planning contemplated by the PFAs; and three mediations remain pending before the FCC for *de novo* review. In addition, the TA granted one request for mediation arising out of the implementation of an FRA involving a Wave 3, Stage 1 licensee, which has been resolved.

_

²¹ Given that many of the Public Safety licensees in the ESMR Band may also be NPSPAC channels licensees, the TA in the RPP provided flexibility in negotiating the timing of reconfiguration implementation of ESMR channels (*see* RPP at 33-34). In addition, there is no Guard Band in the Southeastern United States; however, there is an Expansion Band (812.5-813.5 MHz/857.5-858.5 MHz, except within a seventy-mile radius of Atlanta where it is located at 813-813.5 MHz/858-858.5 MHz) from which Public Safety licensees will be relocated unless they elect to stay.

4. **Wave 4, Stage 1**

The mandatory negotiation period ended on January 2, 2007 for licensees in the 13 NPSPAC regions in Wave 4, Stage 1. Wave 4, Stage 1 now also includes licensees whose Gulf Coast Wave Change Requests were granted. As of March 31, 2007, the TA received 98 FRAs and approved 93 FRAs for Wave 4, Stage 1 licensees out of an expected total of 168 FRAs. Thus, 55 percent of the FRAs expected for Wave 4, Stage 1 licensees have been approved.

Prior to the formal start of the mediation period on January 3, 2007, the TA had received, investigated, and granted eight requests for early mediation involving Wave 4, Stage 1 licensees. On January 3, 2007, the TA opened 62 mediation dockets, in addition to the eight that had been previously opened, for a total of 70 Wave 4, Stage 1 mediation dockets involving licensees not affected by the international border areas with Mexico and Canada. Of these 70 mediation dockets, 36 involved Public Safety licensees.

As of March 31, 2007, 52 mediation dockets had been resolved through the negotiation of FRAs or the cancellation or assignment of licenses; 11 resulted in the negotiation of PFAs with FRAs still to be negotiated upon the completion of the planning contemplated by the PFAs; and the parties in four mediations had reached agreement but had not yet executed PFAs or FRAs. No mediations were referred to the FCC for *de novo* review.

Licensees with systems located in or affected by the international border areas with Mexico and Canada, as defined by the FCC, have not yet received replacement frequency proposals from the TA pending the availability of revised border area frequency plans. As noted in Section I.A. of this report, the FCC issued a Public Notice on March 30, 2007, modifying the schedule for Wave 4, Stage 1 licensees still awaiting frequency proposals. The FCC extended the mandatory negotiation period by an additional 90 days until July 1, 2007 and postponed the start of the mediation period until July 2, 2007 for such licensees. There are approximately 80 licensees with systems entirely within an FCC-defined border area; 48 licensees with systems both inside and adjacent to an FCC-defined border area; and 73 licensees with systems adjacent to FCC-defined border areas and close enough to be affected; for a total of 201 licensees affected by the extension. Once the frequency plans are established, it is expected there will be some consolidation of the 201 licensees into a smaller number of FRAs. Also, some portion of the 168 anticipated FRAs in Wave 4, Stage 1 noted above are included in the 201 licensees delayed because further analysis indicated they were affected by the border and replacement frequencies cannot be determined. This development will have an impact on the Wave 4 reconfiguration schedule. The development of border area frequency plans thus remains a necessary milestone for successful completion of the reconfiguration program.

During the extended negotiation period, licensees affected by the border areas are not required to engage in planning or negotiation prior to the receipt of proposed replacement frequencies from the TA. Licensees may elect to engage in such activities to the extent that they

²² The remaining deals out of the 168 expected FRAs are for licensees affected by the international border areas.

are not frequency-dependent and would not result in unnecessary duplication of costs. If funding is required, licensees will need to submit an RFPF to the TA and negotiate a PFA with Sprint Nextel.

For Wave 4, Stage 1 licensees who did not receive Frequency Proposal Reports ("FPRs") by August 1, 2006, Requests for Planning Funding submissions (if necessary) will be due 45 days from the date of the FPR mailing to the licensee. The RFPF deadline will be noted in the FPR cover letter. In general, FPRs were sent only to licensees far enough away from the border so as not to be affected by revised border area frequency plans. Consistent with the FCC's March 30, 2007 Public Notice, licensees in the FCC-defined border areas, and in areas adjacent to the border areas, will not be receiving replacement frequency proposals until revised border area frequency plans are available.

C. Overview of Negotiations for Stage 2 (NPSPAC and Public Safety Expansion Band)

The following sections provide a summary of progress during the first quarter of 2007 of negotiations for Stage 2 reconfiguration. As planning, negotiations, and reconfiguration implementation for Stage 2 reconfigurations are generally more complex than Stage 1 reconfigurations, the TA strongly encourages all parties to engage in planning and negotiation as early as possible. Unlike Stage 1, in which approximately half of all licensees in each wave entered mediation, approximately 85 percent of Wave 1, Stage 2 and 90 percent of Wave 2, Stage 2 licensees entered mediation.

1. Summary of Status

As further described below, progress has been made to date in the negotiation and approval of FRAs for NPSPAC and Public Safety Expansion Band licensees (Stage 2). As of March 31, 2007, 22 percent of FRAs for NPSPAC and Public Safety Expansion Band frequencies have been submitted to the TA, totaling \$32 million.

Wave 1, Stage 2 (NPSPAC and Expansion Band relocations) is the largest of the NPSPAC channel reconfiguration waves, with 343 FRAs expected to be completed between Sprint Nextel and Public Safety agencies.²⁴ These systems and FRAs generally are larger and more complex than those of Stage 1 licensees. As of March 31, 2007, the TA received 155 FRAs and approved 143 FRAs for Wave 1, Stage 2 licensees. In addition, the TA received 124 PFAs and approved 121 PFAs for Wave 1, Stage 2 licensees as of March 31, 2007. Appendix 5 provides information in summary form about the status of negotiations for NPSPAC licensees as of March 31, 2007.

The Wave 1, Stage 2 mandatory negotiation period ended on October 31, 2006 and the mediation period began on November 1, 2006. Prior to the formal start of the mediation period, the TA granted 56 requests for early mediation involving Wave 1, Stage 2 licensees. On November 1, 2006, the formal start of the mediation period, the TA opened 267 mediation dockets, in addition to the 56 that had been previously opened, for a total of 325 Wave 1, Stage 2 mediation dockets.

As of the end of March 2007, 140 mediation dockets had been resolved. The parties in 134 mediations had negotiated PFAs and were in various stages of planning; five had reached agreement but had not yet executed FRAs. In addition, the parties in nine mediation dockets had reached agreement on terms but not yet executed their PFAs or FRAs. Twenty-four mediation dockets were the subject of Recommended Resolutions pending before the FCC for de novo review.

^{*}Wave TBD (To Be Determined) – Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave.

²⁴ This total also includes reconfiguration of Public Safety Expansion Band licensees. Any changes to estimated deal numbers from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (i.e., deals cancelled or consolidated).

Wave 2, Stage 2 3.

The three-month mandatory negotiation period for Wave 2, Stage 2 licensees began on November 1, 2006 and ended on January 31, 2007. As of March 31, 2007, of the 220 FRAs anticipated to be negotiated in Wave 2, Stage 2, the TA received 58 FRAs and approved 51 FRAs. In addition, the TA received 79 PFAs and approved 73 PFAs for Wave 2, Stage 2 licensees as of March 31, 2007. There were also 61 RFPFs in various stages of negotiation.

Following the conclusion of each mandatory mediation wave the TA has interviewed TA Mediators, Sprint Nextel, incumbent licensees, licensee representatives, and vendors to solicit their views regarding mediation and invite suggestions as to how the mediation process could be improved. As a consequence of these consultations, the TA reviewed and revised its training materials for TA Mediators to focus on the potential issues faced in the next wave of mediations. For example, with respect to Wave 2, Stage 2, the TA focused its mediation training on planning funding, interoperability, the need to accommodate the large number of licensees expected to enter mediation and the fact that many of these licensees were expected to either be seeking planning funding or to have only recently negotiated PFAs. As it has done prior to other mediation periods, the TA conducted additional training for TA Mediators.

Prior to the formal start of the mediation period on February 1, 2007, the TA had received, investigated, and granted three requests for early mediation involving Wave 2, Stage 2 licensees. On February 1, 2007, the formal start of the mediation period, the TA opened 221 mediation dockets, in addition to the three that had been previously opened, for a total of 224 Wave 2, Stage 2 mediation dockets.

As of the end of March 2007, 52 mediation dockets had been resolved. The parties in 89 mediations had negotiated PFAs and were in various stages of planning. In addition, the parties in nine mediation dockets had reached agreement on terms but not yet executed their PFAs or FRAs. One mediation docket was the subject of a Recommended Resolution forwarded to the FCC for de novo review.

4. Wave 3, Stage 2

The three-month voluntary negotiation period for Wave 3, Stage 2 licensees began on November 1, 2006 and ended on January 31, 2007.²⁵ The three-month mandatory negotiation period for these licensees began on February 1, 2007 and ended on April 30, 2007. Wave 3, Stage 2 also includes certain call signs with Southeast ESMR Band frequencies that were deferred from Wave 3, Stage 1 at the request of the licensee. As of March 31, 2007, the TA has received four and approved three FRAs in Wave 3, Stage 2. In addition, the TA received 46 PFAs and approved 46 PFAs for Wave 3, Stage 2 licensees as of March 31, 2007. The TA anticipates that approximately 260 licensees are likely to enter mediation on May 1, 2007.

²⁵ See Public Notice, "Public Safety and Homeland Security Bureau Announces that 800 MHz Band Reconfiguration will Commence November 1, 2006, in the NPSPAC Regions Assigned to Wave 3 for NPSPAC Channels," WT Docket No. 02-55, DA 06-1939 (rel. Oct. 2, 2006).

5. **Wave 4, Stage 2**

The three-month voluntary negotiation period for Wave 4, Stage 2 licensees commenced on February 1, 2007 and ended on April 30, 2007. As of March 31, 2007, the TA had received and granted one request for mediation involving a Wave 4, Stage 2 licensee, which has been resolved. In addition, the TA received seven PFAs and approved seven PFAs for Wave 4, Stage 2 licensees as of March 31, 2007.

D. Publication of Aggregated Median Cost Data (FRAs)

On January 8, 2007, the FCC released an Order instructing the TA to make available a set of cost metrics that identify statistical measures of licensee reconfiguration implementation costs and rates, based on system size. On March 26, 2007 the TA published, on its website, aggregated information regarding median costs for the key common elements of approved Public Safety FRAs. These metrics were based on data taken from 275 approved FRAs for Public Safety licensees and include:

- Aggregate implementation costs for reconfiguration of 800 MHz Public Safety Systems broken down by system size,
- Median reconfiguration costs and cost ranges by implementation cost category,
- Median incumbent licensee and vendor labor rates by implementation cost category, and
- Distributions of incumbent licensee and vendor costs across all implementation cost categories.

The TA expects this information to be beneficial to Public Safety licensees in the preparation of cost estimates for their FRAs and to expedite the negotiation of FRAs.

E. Planning Funding

Many licensees with small or simple systems are able to include planning costs (if any) in their FRA. However, as Stage 2 Public Safety licensees have entered the negotiation periods for their respective waves, the TA has observed a more significant need for advance planning funding because Public Safety licensees tend to manage larger and more complex systems. Through March 31, 2007 the TA approved 301 PFAs totaling \$44.8 million. Another 177 RFPFs totaling \$37.6 million were in negotiation between the parties as of March 31, 2007 and of this total, 97 requests totaling \$19.5 million had been agreed to by Sprint Nextel and awaited the licensee's approval of the contract.

1. Fast Track Update

The Fast Track Option for planning funding, which is designed to streamline negotiations and enable licensees to more quickly obtain advance funding and complete their planning, was

²⁶ See Public Notice, "Public Safety and Homeland Security Bureau Announces that 800 MHz Band Reconfiguration will Commence February 1, 2007, in the NPSPAC Regions Assigned to Wave 4 for NPSPAC Channels," WT Docket No. 02-55, DA 06-2618 (rel. Dec. 29, 2006).

first announced in May 2006. As intended, the Fast Track Option has benefited both the program and numerous licensees by streamlining negotiations and enabling licensees to more quickly obtain advance funding and complete their planning. Through March 31, 2007, 22 percent of RFPFs (65 of 301 total) submitted to the TA since June 15, 2006 were eligible for the Fast Track Option.

2. Publication of Aggregated Median Cost Data (PFAs)

To assist those Public Safety licensees that still require Planning Funding with the preparation of planning cost estimates, and to expedite the process of negotiating PFAs with Sprint Nextel, the TA published on its website on February 8, 2007 median costs for the key common elements of approved PFAs.²⁷ These cost metrics identified typical licensee planning costs and rates based on system size. These metrics were gathered from approved PFAs as of November 2006 and include:

- Median incumbent licensee and vendor costs for the five major categories of work found in all PFAs: Frequency Analysis, System Inventory, Engineering & Implementation Planning, Legal Support, and Project Management;
- 25th and 75th percentile figures, defining the range within which half of the licensee population falls;
- Median incumbent licensee and vendor labor rates for these same five work categories; and
- Median distributions of incumbent licensee and vendor costs across all work categories.

The TA expects that this information should prove beneficial to stakeholders by expediting the preparation of RFPFs and negotiation of PFAs.

3. Planning Funding Statistics

For the quarter ended March 31, 2007, the TA forwarded 44 RFPFs to Sprint Nextel and the licensee for negotiation of a PFA.

_

²⁷ See Press Release, "Transition Administrator Publishes Statistical Data on Planning Funding Agreements" (rel. Feb. 8, 2007), available at http://www.800TA.org/content/news/2007/02_08_07.asp; see also TA, "Cost Metrics for Licensee Planning Funding," available at http://www.800TA.org/content/implementation/Planning_Funding_Statistics.asp.

Table 3: Number of RFPFs Reviewed by the TA and Forwarded to Sprint Nextel and the Licensee

Period	Number of RFPFs Forwarded to Sprint Nextel
Prior to February 2006*	41
February-March 2006	35
Q2 2006 Total	92
Q3 2006 Total	171
Q4 2006 Total	97
January 2007	27**
February 2007	14
March 2007	6
Q1 2007 Total	47

Prior to February 1, 2006, RFPFs were sent directly by licensees to Sprint Nextel.

As of March 31, 2007, Sprint Nextel submitted 310 negotiated PFAs to the TA for processing, including 256 PFAs for Stage 2 licensees. Of the 310 PFAs received, the TA reviewed and approved 301 PFAs, including 247 PFAs for Stage 2 licensees. Beginning February 1, 2006 and through the end of March 2007, the TA received RFPFs from licensees across all waves that requested a total of approximately \$87.5 million in planning funding. The total value of negotiated PFAs as of March 31, 2007 was \$46.6 million.

The FCC released a Public Notice²⁸ on December 20, 2006 concerning the status of Special Temporary Authorizations ("STAs") in the reconfiguration program. The Public Notice was in response to questions from Public Safety licensees seeking clarification as to what procedure should apply to STA requests or applications for new or modified facilities that are filed before the conclusion of the transition period. Public Safety licensees also questioned whether and, if so, under what circumstances Sprint Nextel is obligated to pay the rebanding costs of facilities that are authorized and activated on a licensee's old frequency band during the transition period, including for STAs obtained during the application freeze by licensees either to expand or enhance the coverage or capacity of their existing systems.

The FCC noted first that under the reconfiguration program, once negotiation in a particular NPSPAC region begins, permanent licensing on pre-rebanding frequencies should cease and subsequent licensing should be consistent with the new, post-rebanding band plan. Nonetheless, because some Public Safety licensees may have a compelling need to expand their facilities on pre-rebanding frequencies prior to the availability of new channels, the FCC clarified that it will accept applications for STAs on pre-rebanding frequencies during the freeze

^{**} Three RFPFs were received in 2006 but were unaccounted for in the previous quarterly reports. They have been added to the January 2007 count.

_

²⁸ *Public Notice*, "Public Safety and Homeland Security Bureau Provides Guidance for Public Safety Licensees with regard to License Application and Special Temporary Authorization Procedures and Payment of Frequency Relocation Costs for Public Safety Facilities Added During 800 MHz Band Reconfiguration," DA 06-2555 (rel. Dec. 20, 2006).

and post-freeze period. Public Safety licensees seeking such authorizations, however, must demonstrate a "compelling public interest need" to improve the capacity or coverage of their systems, including why the requested facilities must be implemented prior to the end of band reconfiguration. Regarding payment, the FCC clarified that Sprint Nextel is not required to pay the frequency relocation costs of facilities authorized under an STA on pre-rebanding frequencies after the freeze has ended. In exceptional cases, however, licensees may file a waiver request that Sprint Nextel pay the relocation costs of these facilities and that the licensee reopen negotiations with Sprint Nextel to include these costs. Specific criteria for a waiver is included in the Public Notice.

In a letter to the FCC on February 12, 2007, Sprint Nextel sought confirmation that its payments for relocation costs of public safety radio facilities authorized pursuant to STAs would be creditable expenses toward its anti-windfall payment obligations.²⁹ The FCC clarified that in any instance in which it is determined that Sprint Nextel is responsible for payment of a public safety licensee's reasonable relocation costs, Sprint Nextel may claim credit for such costs, including instances where the FCC grants a waiver request requiring Sprint Nextel to be responsible for relocation costs of post-freeze facilities authorized by STA.³⁰

F. FCC De Novo Review

As of May 10, 2007, the FCC had issued orders resolving twelve mediation disputes that the TA has presented for *de novo* review:

- Chevron USA (released October 6, 2006): The FCC ruled on the eligibility of Channels 1-120 mobile-only authorizations for cost reimbursement from Sprint Nextel.
- Manassas, Virginia (Released October 24, 2006): The FCC ruled on three disputes regarding transactional cost estimates for internal labor, attorneys' fees, and consultant fees.
- State of Maryland (released October 24, 2006): The FCC ruled on the applicability of "drive testing" to the licensee's systems to determine whether it had received comparable facilities following band reconfiguration.
- Montgomery County, Maryland (released November 3, 2006): The FCC ruled on several disputes between the licensee and Sprint Nextel regarding language in the proposed FRA: (1) changes in the schedule for system reconfiguration; (2) Sprint Nextel's obligation to pay reconfiguration costs if a vendor fails to perform as obligated; (3) eligibility of testing to determine comparable facilities; (4) Sprint Nextel's responsibility for cost overruns; (5) whether full prepayment of all estimated costs is to occur upon execution of the FRA; (6) whether the parties reserve their rights to object to or terminate the FRA; and (7) whether the FRA should include language specifying that it was drafted by Sprint Nextel and the TA. The FCC also ruled on cost issues involving acceptance testing and

²⁹ See Letter from J. Goldstein, Sprint Nextel to D. Furth, FCC, WT Docket No. 02-55 (filed Jan. 9, 2007)("January 9, 2007 Sprint Nextel Letter").

³⁰ See Letter from D. Furth, FCC to J. Goldstein, Sprint Nextel, WT Docket No. 02-55 (rel. Feb. 12, 2007)("February 12, 2007 FCC Letter")

- baseline drive testing; project management and retuning coordination performed by County employees; overtime for retuning police radios; and consultant fees. A Petition for Review of the FCC's decision was filed before the end of the quarter.
- City of Boston, Massachusetts (released December 20, 2006): The FCC ruled on the need for and eligibility for reimbursement by Sprint Nextel for the cost of third-party, proprietary software for management and tracking of mobile and portable radios for reconfiguration. A Petition for Review and a Petition for Reconsideration of the FCC's decision were filed and the FCC ruled during this quarter that an evidentiary hearing should be held on this issue. The FCC also issued during this quarter a clarification regarding recoverability of expenses for multiple touches of mobile and portable radios, the need for which arose out of statements made in its earlier ruling.

G. Public Safety Secondary Licenses

In the January 9, 2007 Sprint Nextel Letter, Sprint Nextel sought guidance on whether non-primary 800 MHz licenses, other than STAs, held by public safety licenses are eligible for retuning. Examples of such licenses given by Sprint Nextel were mobile-only licenses, FB2T licenses, and secondary licenses for offset channels.³¹ A February 12, 2007 letter from the FCC provided such guidance. In that letter, the FCC stated that the treatment of mobile-only, FB2T, and offset channel authorizations depends on the specific facts of each case. The FCC stated that Sprint Nextel should generally be required to pay for retuning of mobile-only facilities in the NPSPAC Band where licensees needed to have the continued ability to operate on NPSPAC channels. In the case of FB2T licenses, Sprint Nextel would be held responsible for retuning costs for licenses intended to be used for facilities such as mobile command center base stations used on a recurring basis such as responding to emergencies, but generally not for a facility intended for a short-term use of a year or less as an alternate site for a previously existing facility. With respect to offset channel authorizations, the key factors would include how long the offset facility has been part of the licensee's system and the degree to which it is an integral and necessary part of the licensee's overall system. If the operation of a licensee's system would be significantly degraded or compromised in comparison to pre-rebanding operation by failure to retune the offset facility, this would weigh in favor of the facility being retuned at Sprint Nextel's expense.³²

H. Reconfiguration Implementation Progress

Parties have made good progress in physically clearing Channels 1-120, which is a necessary prerequisite for Public Safety to begin its reconfiguration of NPSPAC channels. The TA generally measures the status of Stage 1 reconfiguration implementation progress in two ways: (1) the number and percentage of Stage 1 call signs that Sprint Nextel reports as being cleared by licensees; and (2) clearing as a percentage of Stage 1 FRAs that Sprint Nextel has entered into with Channel 1-120 licensees.

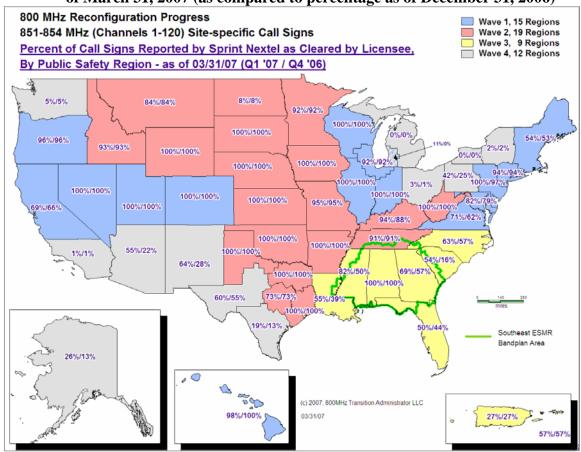

³¹ See January 9, 2007 Sprint Nextel Letter.

³² See February 12, 2007 FCC Letter.

As of March 31, 2007, approximately 56 percent (up from 52 percent as of December 31, 2006) of the Stage 1 non-EA call signs were reported by Sprint Nextel as being cleared by licensees, including 85 percent of Wave 1 and 93 percent of Wave 2 call signs. Map 2 below illustrates the percentage of Channels 1-120 call signs reported cleared in each NPSPAC region as of the end of the first quarter of 2007 in comparison to the percentage at the end of the fourth quarter 2006 (displayed as first quarter percentage/fourth quarter percentage).

Map 2: Percentage of Channels 1-120 Call Signs Reported Cleared, by NPSPAC Region as of March 31, 2007 (as compared to percentage as of December 31, 2006)³³

As of March 31, 2007, Sprint Nextel is reporting that physical reconfiguration is complete for 77 percent of all Channels 1-120 FRAs (an increase from 70 percent as of December 31, 2006), including 95 percent for Wave 1, 95 percent for Wave 2, 77 percent for Wave 3, and 29 percent for Wave 4. Table 4a below illustrates the percentage of FRAs entered into by Sprint Nextel and Channels 1-120 licensees and provides a summary of FRA milestones statistics by wave.

20

³³ The licensee clearing information is provided by Sprint Nextel. Regions adjacent to international borders will not reach 100 percent until revised border area frequency plans are available.

Table 4a: Status of Reconfiguration for Licensees in Channels 1-120 as of March 31, 2007 (milestones achieved by number of FRAs)³⁴

		ΤA	Ψ	ъ	eted		Ret	ed ed

^{*} Wave TBD (To Be Determined) – Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave. In addition, certain EA licensees are included in this "Wave TBD" category. The TA has received and approved five FRAs that have included EA licenses.

A summary of site-specific (non-EA) Channels 1-120 call sign milestone statistics by wave is presented in Table 4b below. The differences between the numbers by percentages of call signs compared to the numbers by percentages of FRAs largely reflect the size and complexity of the systems that remain in the mediation process. Simply put, the FRAs remaining in mediation involve systems with a greater number of call signs compared to those for which the parties have been able to reach agreement.³⁵

^{**} Does not include any estimate of deals that will include call signs in the FCC-defined border areas.

³⁴ Sprint Nextel is the data source for columns 2 and 6. Total number of FRAs can change based on how Sprint Nextel structures various agreements with licensees.

³⁵ There are a small number of call signs in Wave 1 and 2 that are in the FCC-defined border areas that are not included in FRA data.

Table 4b: Status of Reconfiguration for Licensees in Channels 1-120 as of March 31, 2007 (milestones achieved by number of call signs)

^{*} Includes call signs in the FCC-defined border areas.

Viewed from a geographic perspective, Map 3 below shows the progress of 800 MHz Band Reconfiguration in the key first step of clearing the Channels 1-120 to allow the ultimate relocation of the NPSPAC band. Tracking the progress against the Channels 1-120 locations as of September 2005, very clear progress has been made in all areas of the country outside the areas adjacent to international borders.

800 MHz Reconfiguration Progress

110 Clearing progress

1-120 Clearing progre

Map 3: Channels 1-120 Locations and Reconfiguration Status, by NPSPAC Region as of March 31, 2007³⁶

Data from reconfigurations to date indicate that it is taking licensees an average of approximately 120 calendar days to get from approval by the TA of their FRA to reporting clearing of their Channels 1-120 frequencies.³⁷ Given the number of regions with 100 percent of FRAs approved by the TA (25 regions as of March 31, 2007) and the number of regions with more than 90 percent approved (five regions as of March 31, 2007), the TA anticipates that Channels 1-120 physical clearing in Waves 1 and 2 will be generally complete in time for NPSPAC reconfiguration implementations to proceed as scheduled. There is every reason to believe that similar progress will be made in Waves 3 and 4 as FRAs are completed.

³⁶ The licensee clearing information is provided by Sprint Nextel. Regions adjacent to international borders will not reach 100 percent until revised border area frequency plans are available.

³⁷ During that time period, FCC applications are being filed and granted to add replacement channels to the licenses of the incumbent licensee, Sprint Nextel is clearing the replacement channels to which the licensee is moving, and the licensee is implementing its reconfiguration plan.

While there has been significant progress in negotiating FRAs, clearing Channels 1-120, and completing reconfiguration implementation, the TA has observed significant lags between completing physical retuning and completing all necessary filings with the FCC and processing reconfiguration completion certifications ("Completion Certifications") through Sprint Nextel and the TA. As of March 31, 2007, the TA verified Completion Certifications for a total of 446 FRAs for Stage 1 licensees across all waves (44 percent), including 208 Wave 1, Stage 1 FRAs (59 percent) and 125 Wave 2, Stage 1 FRAs (61 percent). The distribution is 59 percent of Wave 1, 61 percent of Wave 2, 35 percent of Wave 3, and 15 percent of Wave 4 FRAs. As discussed further in Section II.E. of this report, as of March 31, 2007, the average elapsed time between the completion of physical retuning and the completion the closing certification process for Channels 1-120 FRAs across all waves was approximately 4 months.

I. Subscriber Equipment Deployment

The TA and Sprint Nextel identified two licensees as pilot cases to reach agreements for early deployment of subscriber units. The TA approved those agreements in late March 2007. While these pilot cases are moving forward, subscriber deployment must proceed on a much broader scale in parallel with negotiation of reconfiguration agreements. To that end, the TA worked with vendors, licensees, and Sprint Nextel to develop standards for levels of effort for subscriber unit installation labor so that agreements for subscriber deployment can proceed in most cases without detailed negotiations. The TA developed a request form, instructions, and a Frequently Asked Questions (FAQ) paper to implement the Subscriber Equipment Deployment (SED) initiative. This initiative was publicly announced on March 20, 2007.

J. Elections

1. Economic Area Elections

The TA received 23 EA Election filings in response to its January 11, 2006 Press Release announcing the 20-day filing window for EA licensees to file new elections or modifications to previous elections to relocate to or remain in the ESMR Band.³⁸ During the quarter ended March 31, 2007, the TA continued to review these filings and work on and issue frequency proposals for the EA licensees.

As of March 31, 2007, the TA has received and approved five FRAs that have included EA licenses in Waves 1, 2, and 3. One EA licensee in Wave 1 and one EA licensee in Wave 3 – including EA licenses being relocated from Channels 1-120 – remain in mediation.

2. Expansion Band Elections

Through March 31, 2007, the TA received 194 Expansion Band Election filings in response to its June 28, 2005 Press Release announcing that incumbent Public Safety licensees

³⁸ See 800 MHz Transition Administrator, LLC's Ex Parte Notification, WT Docket No. 02-55 (filed Jan. 11, 2006) (attaching Press Release announcing election deadline); see also http://www.800TA.org/content/news/2006/01_11_06.asp.

could elect to remain in the Expansion Band.³⁹ The initial deadlines for licensees in all waves to submit Expansion Band Election filings have passed. Appendix 4 contains a list of entities filing Expansion Band Elections as of March 31, 2007.

³⁹ See 800 MHz Transition Administrator, LLC's Ex Parte Notification, WT Docket No. 02-55 (filed June 30, 2005) (attaching Press Release announcing election deadline); see also http://www.800TA.org/content/news/2005/06_28_05.asp.

II. KEY RECONFIGURATION DATA

This section of the Quarterly Progress Report summarizes key reconfiguration data for the quarter ended March 31, 2007.

A. <u>Licenses to Be Reconfigured</u>

The table below provides the TA's analysis of the current population of call signs per wave. The primary source of this data is the FCC's Universal Licensing System ("ULS") database, with geographical augmentation by the TA to determine NPSPAC region and other reconfiguration-specific information. This data defines the population of licenses that need to be reconfigured, and is be updated to reflect changes made to the ULS database.⁴⁰

Table 5: Current Population of Call Signs, Per Wave⁴¹

Wave	Channels 1-120	Public Safety Expansion Band	NPSPAC	Southeast ESMR Band	Total					
	Number of Call Signs									
Wave 1	799	336	1497	0	2632					
Wave 2	478	189	559	7	1233					
Wave 3 ⁴²	548	215	787	243	1793					
Wave 4	882	328	1295	0	2505					
TOTAL	2707	1068	4138	250	8163					

Assumptions

The TA has made certain assumptions regarding the population of licenses to be reconfigured. First, for spectrum planning purposes, unless notified otherwise, the TA has assumed that all Public Safety licensees in the Expansion Band would relocate. The number of call signs to be reconfigured would decrease to the extent that the TA receives elections from Public Safety incumbent licensees opting not to reconfigure. Through March 31, 2007, the TA

⁴⁰ The table includes site-specific (non-EA) call signs with primary fixed locations above 851 MHz. It does not include Sprint Nextel or SouthernLINC call signs. There are a number of ancillary call signs licensed in the 806-824 MHz range that are not included in the counts but will, however, be reconfigured in association with related call signs that are included in the counts. *See* Appendix 4 for more detailed data.

⁴¹ The data in the table includes call signs in the FCC-defined international border areas adjacent to Canada and Mexico.

⁴² By June 30, 2006 the TA had received and approved requests to defer 38 Channels 1-120 call signs to Wave 4 from licensees in the Hurricane Katrina affected region. These call signs are still counted in the Wave 3 data.

⁴³ A list of entities that submitted Expansion Band Election filings through March 31, 2007 appears in Appendix 4.

has received 194 Expansion Band Election filings from Public Safety licensees to stay in the Expansion Band. 44 Second, mobile-only systems and other secondary licenses (itinerant, demonstration, and temporary) are not generally being reconfigured in bands other than the NPSPAC channels. 45 Third, licenses under contract for voluntary reconfiguration agreements for which Sprint Nextel will not be seeking credit are not included in the totals. Fourth, the call sign figures in this report include only active call signs. The current population of call signs will be reduced by any call signs that cancel without an FRA; it will also be increased for new call signs granted from pending applications filed prior to the commencement of an application freeze related to reconfiguration. Fifth, the data includes call signs in the FCC-defined international border areas adjacent to Canada and Mexico. In these areas the calls signs are defined based on the standard U.S. band plan; the data may change once revised border area frequency plans are available. Finally, the TA and Sprint Nextel have jointly defined milestones to track the status of ongoing reconfiguration activities at the licensee level.

B. Frequency Proposals

Frequency Proposal Reports ("FPRs") were prepared and mailed in January and February 2007 for Wave 4, Stage 2 NPSPAC call signs granted as of December 31, 2006. Because of the international border band plans still under negotiation with Canada and Mexico, the FPRs mailed were generally for the systems in Wave 4 NPSPAC regions located far from the FCC-defined border areas. As additional call signs are granted for pending applications or because of additional analysis of border clearing options, FPRs will be sent in periodic batches.

As of March 31, 2007, the TA had analyzed and proposed replacement frequencies for 4,106 Wave 1, Stage 1 and Expansion Band frequencies and 28,511 Wave 1 NPSPAC frequencies; 2,035 Wave 2, Stage 1 and Expansion Band frequencies and 11,519 Wave 2 NPSPAC frequencies; 3,654 Wave 3, Stage 1 and Expansion Band frequencies and 18,525 Wave 3 NPSPAC frequencies; and 829 Wave 4, Stage 1 frequencies and 1,066 Wave 4 NPSPAC frequencies. During this quarter, a total of 80 additional Channels 1-120 and Expansion Band frequencies were analyzed and replacement frequencies were proposed.

The TA has sent 1,083 FPRs for Public Safety Expansion Band call signs in Waves 1-4. Although Public Safety licensees may elect to remain on their current channels, for planning purposes, new frequency proposals were prepared for all relevant call signs. Most of these Expansion Band frequencies will be reconfigured within the same timeframe as the NPSPAC

⁴⁴ The TA has granted license requests for rescission of ten of these elections.

⁴⁵ As noted in Section I.E. above, on December 20, 2006, the FCC issued guidance regarding the treatment of Special Temporary Authority (STA) licenses within the Reconfiguration process. The TA is still assessing which licensees and call signs are affected by this guidance and will update Call Sign, FPR and related data as necessary as it is determined which STA call signs are affected by Reconfiguration.

⁴⁶ As of March 31, 2007, Public Safety licensees had filed elections <u>not</u> to reconfigure for 377 call signs.

channels once Channels 1-120 have been cleared. Call signs related to Public Safety licensees that also have 851-854 MHz channels were given priority in anticipation that those licensees would likely be the first to reconfigure out of the Expansion Band.

For each Wave, there were FPRs for certain call signs that were not generated or have been delayed. The primary for this are: (1) the call sign is licensed in the FCC-defined border area; (2) the call sign is adjacent to these border areas and frequency planning must be done in conjunction with the yet-to-be determined specialized frequency plans for these regions; or (3) the licensee negotiated an FRA ahead of its wave and the reconfiguration process is already underway.

Delays in sending certain individual FPRs have not materially impacted the progress of reconfiguration. Generally, the delay in an FPR is indicative of a larger issue that needs to be resolved. Once that issue is resolved, the FPR can be sent and the licensee can move on quickly with the process.

C. Frequency Reconfiguration Agreement Review

The table below provides an overview of the elapsed time required by the TA to review and approve Channels 1-120 FRAs submitted to the TA by Sprint Nextel.

Table 6: TA FRA Review Timeframes (in Business Days) for Approval of Channels 1-120 FRAs

Wave	1-5 Days from Receipt	6-10 Days from Receipt	11-15 Days from Receipt	16-20 Days from Receipt	21 Days or More from Receipt	TOTAL				
	Number of Frequency Reconfiguration Agreements									
Wave 1	287	47	13	0	0	347				
Wave 2	168	34	2	1	0	205				
Wave 3	206	15	4	0	0	225				
Wave 4	89	3	1	0	0	93				
Wave TBD*	2	0	0	0	0	2				
Total, Waves 1-4	752	99	20	1**	0	872				

^{*} Wave TBD (To Be Determined) – Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave. In addition, certain EA licensees are included in this "Wave TBD" category.

The table below illustrates the TA's time to review Channels 1-120 FRAs compared to service level targets, on a percentage basis.

^{**} FRA required coordination with the FCC to ensure licensee's requests were in compliance with the *Report and Order*.

Table 7: TA FRA Review Performance vs. Service Level Targets

Time to Review	Within 5 business days	Within 10 business days	Within 15 business days
Service Levels	80%	95%	100%
TA's Performance	86%	98%	100%

Additional information regarding the status of FRA review for Channels 1-120 (on a per wave, per region basis) can be found in Appendix 6.

Although the TA continues to meet its service level goals for reviewing FRAs, approximately 29 percent of all FRAs approved through March 31, 2007 required the issuance of a Request for Information ("RFI"), including the issuance of RFIs for 49 percent of the Stage 2 FRAs. In some cases, multiple RFIs were issued to resolve deficient items, thereby delaying TA review. Examples of the types of missing information include:

- Lack of or insufficient details associated with the reconfiguration costs;
- Lack of or insufficient details associated with travel costs;
- Lack of or insufficient details associated with Project Management, Legal, or Engineering Consulting services and the associated costs identified in the FRA;
- Inconsistencies between payment terms identified in an FRA and Sprint Nextel's supporting back office system; and
- Lack of, or insufficient details, associated with the timings of reconfiguring licensee systems or filings of applications with the FCC. This was the most significant cause for issuance of RFIs for Stage 2 licensees.

In an effort to increase program efficiencies and decrease the TA's need to request additional information regarding the reconfiguration activities and associated costs included in FRAs in the latter half of 2006, the TA worked with major stakeholders, including Public Safety licensees and leadership, the vendor community, and Sprint Nextel to develop additional guidance regarding how best to develop and communicate a Cost Estimate for an FRA. These documents, "Guidelines for Preparing a Cost Estimate" and "Cost Estimate - Schedule C Template" were published by the TA on January 9, 2007 and are available on the TA's website.

As of March 31, 2007, the number of Stage 2 FRAs approved by the TA was 205, of which the TA processed 195 within 5 days or less, with 8 requiring 6 to 10 days and 2 requiring 11 to 15 days to process. The TA anticipates in many cases that relative to Stage 1 (Channels 1-120) FRAs, Stage 2 FRAs include more complex reconfigurations and associated cost estimates. Additional information regarding the status of FRA review for NPSPAC channels (on a per wave, per region basis) can be found in Appendix 7.

D. FCC Reconfiguration Applications

The TA has worked with FCC staff to define and implement data transfers to authenticate applications related to reconfiguration. The table below summarizes the status of reconfiguration applications for site-specific call signs submitted to the FCC through March 31, 2007.

Table 8: Reconfiguration FCC Application Milestones for Channels 1-120 Call Signs as of March 31, 2007

Wave	Updated Population as of 3/31/2007	Call Signs with Reconfiguration Applications Submitted to FCC	Call Signs with Reconfiguration Applications Granted	Call Signs with Surrender Applications Submitted to FCC ⁴⁷	Call Signs with Surrender Applications Granted
		1	Number of Call Sig	ns	
Wave 1	799	744	744	711	592
Wave 2	478	435	435	451	408
Wave 3	548	377	377	348	195
Wave 4	882	140	127	96	76
TOTAL	2707	1696	1683	1606	1271

The procedure developed by the TA together with the FCC and Sprint Nextel for processing reconfiguration related applications continues to function well. For Private Mobile Radio Service ("PMRS") applications that do not require public notice, the average time from filing to grant has been reduced to approximately 6.5 calendar days. Applications for Specialized Mobile Radio ("SMR") systems that may require a 30-day public notice are being granted in 43.6 calendar days.

Appendix 5 contains additional information regarding the TA's FCC reconfiguration application milestones (on a per region basis) as of March 31, 2007.

E. Status of Reconfiguration Completion Certifications (Closing)

As of March 31, 2007, the TA had received completion certifications ("Completion Certifications") for 472 FRAs and two PFAs. Of these, the TA had reviewed and certified as complete 454 FRAs and two PFAs. The TA is in the process of reviewing the remaining 18 completion certifications. Appendix 8 contains the summary of deals that have closed as of March 31, 2007.

The number of FRA Completion Certifications⁴⁸ submitted to the TA increased by 137 during the quarter ended March 31, 2007. The number of deals for which physical reconfiguration was completed but not yet closed decreased by 59 during the quarter ended March 30, 2007. Within this category, the number of deals in the Actual Cost Reconciliation Process decreased by 60 and the number of deals in the Closing Process increased by 18, as of

⁴⁷ Some FRAs stipulate that certain call signs are to be cancelled rather than reconfigured. Such cancellations are considered surrender applications for the purpose of this analysis. It is possible

one or more waves.

therefore that there will be more Surrender Applications than Reconfiguration Applications for

⁴⁸ From this point forward all subsequent information is related to FRA Completion Certifications only.

March 31, 2007. These were offset by a decrease of 17 deals not included in the Actual Cost Reconciliation or the Closing Processes.

The average amount of time it takes deals to consummate the closing under a FRA once the physical reconfiguration is completed increased to 4.0 months as compared to 3.7 months for the period ending December 31, 2006. Also, there continues to be delays for those deals for which the physical reconfiguration was completed but not yet closed as evidenced by an increase in the average elapsed time from completion of physical reconfiguration to March 31, 2007 of approximately 6.6 months, as compared to approximately 4.8 months for the period ended December 31, 2006.

As of March 31, 2007, the major area for delays was in the Actual Cost Reconciliation Process where 40% and 23% of the deals at this stage were also at this same stage as of December 31, 2006 and September 30, 2006, respectively. The average time to complete the Actual Cost Reconciliation under an FRA once the reconfiguration was completed was influenced by Incumbent delays in processing change notices and/or in submitting to Sprint Nextel accurate and/or timely information required for the Actual Cost Reconciliation as well as Sprint Nextel delays in administering the Actual Cost Reconciliation Process. As evidenced by the decrease of in the number of deals in this category during the quarter, Sprint Nextel is currently addressing the delays in administering the Actual Cost Reconciliation process and expects to see continued improvement in moving deals through the process during the upcoming quarter. For 42% of those deals which were at the Actual Cost Reconciliation stage as of March 31, 2007 and September 30, 2006 and/or December 31, 2006 and Sprint Nextel has experienced difficulties reaching the incumbent, the TA has sent letters to the incumbent requesting the incumbent submit to Sprint Nextel either the Actual Cost supporting documentation or the signed Reconciliation Statement. To minimize the efforts and times associated with the closing process, Incumbents should review the following TA guidance, Change Notice Process Fact Sheet, Actual Cost Reconciliation Fact Sheet and Incumbent Labor Reimbursement Policy, which is available on the TA's website at www.800TA.org. The TA will continue to monitor the closing process.

The status of deals, in terms of numbers of FRAs in each stage of the contract closing process, is listed in the table below.

Table 9: Status of FRAs in the Closing Process (after completion of physical reconfiguration)⁴⁹

Status of FRAs	Number
Closed FRAs	454
FRAs Pending TA Completion Certification Review	18
FRAs in the Sprint Nextel Closing Process Pending:	
Sprint Nextel Execution of the Completion Certificates	23
Sprint Nextel Receipt of Signed Completion Certificates from Incumbents	55
Sprint Nextel Preparation of Completion Certificates	26
Total FRAs in the Sprint Nextel Closing Process	104
FRAs in the Actual Cost Reconciliation Process Pending:	
Sprint Nextel Pending Receipt of Signed Reconciliation Statement	29
Sprint Nextel Waiting for Receipts and Preparing Actual Cost Reconciliation Statement	131
Sprint Nextel Preparing Request for Receipt Letter	33
Total FRAs in the Actual Cost Reconciliation Process	193
FRAs not in the above Closing or Actual Cost Reconciliation Processes:	
Finalization of either certain Reconfiguration Project Management activities or Requisite Regulatory Filings	2
Completion of the Actual Cost Reconciliation and either Finalization of certain Reconfiguration Project Management activities or Requisite Regulatory Filings	15
Completion of the Actual Cost Reconciliation, Requisite Regulatory Filings and certain Reconfiguration Project Management activities	6

III. COMMUNICATIONS WITH STAKEHOLDERS

To facilitate successful 800 MHz band reconfiguration, licensees and other stakeholders must have rapid and consistent access to accurate reconfiguration information, processes and procedures. As such, the TA executes an approach that is intended to engage, educate, and equip the impacted stakeholders with the knowledge necessary to plan and implement reconfiguration activities. The TA employs a multi-pronged approach, including direct calling campaigns, conference and event attendance ("Stakeholder Outreach"), virtual training (Webinars), and interaction with industry press to accomplish these goals.

A. Stakeholder Inquiries

As noted in previous Quarterly Progress Reports, the TA has established a "Contact Center" to receive and process questions and requests for information regarding reconfiguration and the TA's activities. The TA receives inquiries from a variety of stakeholders: licensees, vendors, consultants, associations, and the trade press. During the first quarter, the TA received a total of 3,580 inquiries to the Contact Center (1,501 in January 2007; 1,084 in February 2007; 995 in March 2007). Access to the Contact Center is critically important to ensure that licensees and other stakeholders are able to obtain information to prepare for and implement the reconfiguration of their system(s).

B. <u>TA-Produced Materials and the TA's Website</u>

During the first quarter, the TA continued to distribute informational materials to stakeholders relating to the reconfiguration process, including fact sheets, licensee forms, press releases, direct mailings, and other materials as listed below. Many of these items are posted on the TA's website (www.800TA.org).

- Subscriber Equipment Deployment Guidance This guidance was released to inform licensees of the Subscriber Equipment Deployment (SED) initiative which is designed to expedite the completion of reconfiguration by providing licensees the option to jump-start implementation activities for subscriber equipment before negotiating terms and costs for reconfiguring system infrastructure.
- Planning Funding and Frequency Reconfiguration Agreement Statistics The TA published PFA statistics gathered from over 140 approved PFAs and from 275 approved FRAs for Public Safety licensees. This information was published in the expectation that the information would prove beneficial to Public Safety licensees in the preparation of cost estimates for their FRAs and would expedite the negotiation of FRAs.
- Special Temporary Authorizations Fact Sheet The Special Temporary Authorizations (STA) Fact Sheet was prepared to provide guidance on the process for seeking TA concurrence on reconfiguration-related STA requests.

- Mutual Aid and Interoperability Fact Sheet This Fact Sheet was developed to define the steps that the TA recommends licensees complete as part of the planning process for Mutual Aid and Interoperability channels.
- Guidelines for Preparing a Cost Estimate This guidance was prepared to provide licensees with instructions for preparing a Cost Estimate to submit to Sprint Nextel to request reconfiguration funding and to use for FRA negotiations with Sprint Nextel. The Guidelines also provide the TA's recommendations regarding the minimum level of detail that should be included in a Cost Estimate for tasks and costs associated with the reconfiguration of a licensee's system.
- Change Notice Process Fact Sheet and Form This Fact Sheet was prepared to provide structure and guidance to licensees regarding the Change Notice process if they need to alter their planning or reconfiguration activities.
- Actual Cost Reconciliation Fact Sheet This Fact Sheet was prepared to provide guidance to licensees regarding the documents required to support the costs they have incurred.
- Revised Incumbent Labor Reimbursement Policy This policy addresses reimbursement of licensee internal labor costs incurred in planning for or reconfiguring a licensee's existing facilities to operate on its replacement 800 MHz frequencies. The purpose of the policy is to assist licensees in understanding that advance payments made to them for estimated internal labor costs will need to be reconciled with the internal labor costs they have incurred in planning or reconfiguring their systems.

The TA issued the following press releases during the first quarter:

- "Additional Reconfiguration Guidance for Licensees" (January 9, 2007)
- "Wave 4, Stage 2 RFPF Deadline Information" (January 19, 2007)
- "Important Upcoming Dates for 800 MHz Band Reconfiguration" (January 31, 2007)
- "Transition Administrator Publishes Statistical Data on Planning Funding Agreements" (February 8, 2007)
- "The TA Launches Subscriber Equipment Deployment Initiative to Expedite Reconfiguration Implementation Activities" (March 22, 2007)
- "800 MHz Transition Administrator Publishes Statistical Data on Frequency Reconfiguration Agreements" (March 26, 2007)
- "The TA Release Special Temporary Authorization Guidance" (March 26, 2007)

These new or modified materials, in addition to materials previously published, are intended to provide stakeholders with sufficient information to effectively plan, negotiate, and implement reconfiguration.

As discussed in previous Quarterly Progress Reports, the TA's website is a significant component of the Stakeholder Outreach efforts. The TA's listserv feature – TA Alerts – allows website visitors to sign up to receive emails from the TA with the latest updates and news and, to date, has 175 subscribers. During the first quarter, the TA added a "Progress" menu that will contain information for stakeholders such as TA Quarterly Reports, Planning Funding Statistics, and FRA Statistics. Other updates were made to post and advertise new TA-produced materials as outlined above. In addition, planning and preparation occurred for updates to the Online Reference Guide, to be made available during the second quarter. The TA's website received an estimated 27,000 hits during the first quarter of 2007.

C. Outreach Events and TA-Sponsored Education and Training

1. <u>Meetings and Conferences</u>

Meetings and events are a central component of the TA's ongoing efforts to communicate with and educate impacted stakeholders and licensees. Meetings and conferences attended by TA representatives in this quarter are provided in Appendix 9. In the upcoming quarter, the TA will attend the following events:

- Colorado Statewide Radio Systems Meeting Berthoud, CO April 11, 2007
- Colorado APCO Chapter Meeting Florence, CO April 13, 2007
- CPRA Meeting (SCA APCO) April 12, 2007
- Texas APCO Conference Waco, TX April 14-18, 2007
- Tarrant County Interoperability Group Meeting Tarrant County April 19, 2007
- International EDACS User Group Meeting Roanoke, VA May 3, 2007
- UTC Annual Conference Washington, DC May 7, 2007
- Gulf Coast Regional APCO Meeting May 14-16, 2007
- Florida APCO Conference May 21-25, 2007

2. Webinars

The TA has continued to conduct numerous Webinars that provide information on all facets of reconfiguration. The Webinar series to date has totaled 40 sessions with 932 attendees across the following stakeholder groups: 64.7 percent Public Safety; 2.4 percent Critical Infrastructure Industries licensees; 0.7 percent Business/Industrial Land Transportation licensees; and 26.3 percent other (consultants, vendors, etc.), with the remainder, approximately 5.9 percent, unidentified (these percentages do not include all Webinars because some sessions were not polled). During the first quarter of 2007, the TA offered the following three Webinars:

- Change Notice & Actual Cost Reconciliation
- Cost Estimate & Successful Negotiations
- Interoperability and Mutual Aid

Webinars have proven to be an effective, low-cost method for reaching wide audiences and providing interactive and just-in-time guidance. The TA solicited feedback following each

delivery. According to participant surveys, reaction to the Webinars has been overwhelmingly positive, with participants indicating that the opportunity for live discussion is the most helpful aspect.

3. Licensee Outreach Campaigns

In an effort to further the progress of reconfiguration, and in response to specific requests from the Public Safety community, the TA increased its communication and outreach this quarter. Specifically, the TA executed an outbound communications campaign to licensees in Wave 2, Stage 2 to obtain status information concerning their PFAs and Cost Estimates. This effort helped the TA gain a better understanding of licensee progress in their reconfiguration efforts. This calling campaign, which began 30 days before the end of the mandatory negotiation period, also provided licensees with TA assistance in completing their FRAs. Finally, it identified those licensees that might be impacted by mediation.

The TA also executed an outbound communications campaign to licensees in Wave 3, Stage 2 to obtain the status of their PFAs and Cost Estimates. This calling campaign began was undertaken at the beginning of the mandatory negotiation period. This effort provided an opportunity for the TA to gauge licensee progress in their reconfiguration efforts and to identify those that required assistance.

IV. FINANCIAL

This section provides information for the first quarter of 2007 regarding reconfiguration expenditures, letters of credit, 800 MHz incumbent licensee reviews, the external audit, and the TA's fees and expenses.

A. Reconfiguration Expenditures

1. 800 MHz Incumbent Licensee Costs

As of March 31, 2007, Sprint Nextel and incumbent licensees had executed FRAs and PFAs pursuant to TA-approved cost estimates totaling approximately \$101.8 million, and Sprint Nextel had paid approximately \$40.8 million of this amount as advance payments and for work completed to date.

2. Sprint Nextel Costs

On April 26, 2007, Sprint Nextel reported to the TA that, through March 31, 2007, it had incurred, on a cash basis, approximately \$417.3 million in costs for supporting 800 MHz incumbent licensee relocations and negotiations, including licensee equipment and vendor costs, and for relocating its systems in the 800 MHz band ("Sprint Nextel Costs"). The Sprint Nextel Costs exclude certain amounts incurred related to Sprint Nextel's internal network costs that Sprint Nextel may submit for credit at a later date ("To Be Determined Sprint Nextel Costs"). To date, Sprint Nextel has requested that the TA assess approximately \$164.7 million of the Sprint Nextel Costs (incurred through December 31, 2006) for the purpose of determining whether those costs are creditable against the payment Sprint Nextel will make to the United States Treasury at the completion of reconfiguration ("Creditable Costs"). The TA has performed a review of the approximate \$164.7 million in costs submitted. The status of these costs is as follows:

- \$149.6 million was determined by the TA to be creditable costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audits.
- The remaining \$15.1 million requires additional information from Sprint Nextel to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$252.6 million of the Sprint Nextel Costs or any of the To Be Determined Sprint Nextel Costs to the TA for credit assessment or for external audit.

3. 1.9 GHz Clearing Costs

Sprint Nextel estimates, as reported to the TA, that it has incurred approximately \$246.7 million in costs associated with reconfiguration of the 1.9 GHz band through March 31, 2007.

These costs are reported for informational purposes only. The TA does not conduct a review of these costs.

B. <u>Letters of Credit</u>

For the quarter ended March 31, 2007, Sprint Nextel has made all its required payments to licensees and vendors. Accordingly, there has been no need to draw on the Letters of Credit through March 31, 2007.

As only a limited number of relatively small FRAs have been negotiated with Stage 2 incumbent licensees, Sprint Nextel is not seeking a reduction in the Letters of Credit at this time. In addition, there is no indication at this time that the \$2.5 billion balance in the Letters of Credit is insufficient to cover the costs of reconfiguration or that the balance in the Letters of Credit should be increased. The TA therefore does not recommend a reduction or increase in the Letters of Credit at this time. The TA will reassess the need to increase or reduce the Letters of Credit in the Quarterly Progress Report to be filed for the quarter ending June 30, 2007.

C. 800 MHz Incumbent Licensee Reviews

As of March 31, 2007, the TA received completion certifications for two PFAs and 472 FRAs. These completion certifications were filed as part of the closing process once all planning or reconfiguration implementation activities were completed. The TA has reviewed the amounts expended on planning activities and reconfiguration implementation activities covered by these PFAs and FRAs and concurs with the identified remaining payments due incumbent licensees or refunds due Sprint Nextel, pending any results of the TA's post-close review rights or external audits.

D. External Audit

In the first quarter of 2007, Reznick Group, the external auditor selected by the TA, commenced the annual audit of program expenditures for the year ended December 31, 2006 and from inception through December 31, 2006. The audit report is currently expected to be delivered to the FCC in the second quarter of 2007. As discussed previously, a majority of the Sprint Nextel Costs (\$252.6 million plus the amount for the To Be Determined Sprint Nextel Costs) has not been submitted by Sprint Nextel to the TA for credit assessment or for external audit. Accordingly, these costs will be included in a subsequent period audit.

E. <u>Transition Administrator</u>

1. <u>Fees, Expenses, and Staffing</u>

The TA's fees and expenses for the quarter ended March 31, 2007 were \$10.89 million in fees and \$0.12 million in expenses, for a total of \$11.01 million, which is approximately \$0.42 million lower than the forecast for the first quarter. Additional details are provided in Appendix 10.

TA staffing as of March 31, 2007 consisted of 79 Full Time Equivalents ("FTEs"). The TA's fees and expenses for the quarter ending June 30, 2007 are estimated at \$11.45 million in fees and \$0.26 million in expenses, for a total of \$11.71 million.

2. <u>Disclosure of Non-Reconfiguration Fees</u>

In accordance with the TA's Independence Management Plan, the TA reports that BearingPoint received \$1,275,995 from Sprint Nextel in non-TA fees and costs for the quarter ended March 31, 2007. 50

⁵⁰ See Independence Management Plan for the 800 MHz Transition Administrator Team Members (Version 1.1), WT Docket No. 02-55 (filed May 9, 2005), at 4.

Notes

⁽a) Sprint Nextel is the data source for this column. The figures have not been verified by the TA.

⁽b) PSR TBD (To Be Determined) - The TA is unable to accurately assign a PSR based on data provided.

⁽c) Wave TBD (To Be Determined) - Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave. In addition, certain Economic Area ("EA") licensees are included in this Wave Undetermined category.

Notes:

- a. Data for Channel 1-120 call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. Data includes call signs in the international border area. Data may change depending upon border area frequency plans.
- c. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- d. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.
- e. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- f. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

- c. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- d. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.
- e. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- f. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

Notes

- (a) Sprint Nextel is the data source for this column. The figures have not been verified by the TA.
- (b) PSR TBD (To Be Determined) The TA is unable to accurately assign a PSR based on data provided.
- (c) Wave TBD (To Be Determined) Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave.

Notes:

- * Public Safety Region (PSR) includes call signs in the international border area. Data may change depending upon border area frequency plans.
- a. Data for Channels 1-120 call signs excludes call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts are not going to be submitted to the TA for review and approval for Sprint Nextel credit. Data for Expansion Band call signs excludes call signs under prior contract and call signs for which licensees have elected not to reconfigure.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data for Channels 1-120 call signs includes call signs with at least one primary fixed location authorized for frequencies the 851-854 MHz range with adequate geographic data to determine a PSR. Expansion Band data includes call signs with at least one primary fixed locations in the Expansion Band, as the Expansion Band may be defined inside and outside the Southeast ESMR region, with adequate geographic data to determine a PSR. NPSPAC data includes call signs with fixed locations in the 866-869 MHz range with adequate geographic data to determine a PSR. Southeast ESMR Band data includes call signs with fixed locations in 858.5-862 MHz range within the Southeast ESMR region and with adequate geographic data to determine a PSR. Call signs with locations in multiple PSRs are counted for each PSR. Call signs are counted within every PSR for which they have a fixed primary location.
- d. Data has been adjusted to reflect the change in the band plan in the Atlanta area pursuant to the Memorandum Opinion and Order released October 5, 2005.

Notes

- (a) Public Safety Region (PSR) includes international border area. Data may change depending upon border area frequency plans.
- (b) PSR TBD (To Be Determined) The TA is unable to accurately assign a PSR based on data provided.
- (c) Wave TBD (To Be Determined) Deals projected by Sprint Nextel that have no call signs yet associated with them. The proper reconfiguration wave category will generally be determined upon the TA receiving the associated call sign assets or the FRA, although some deals cannot be classified by wave.
